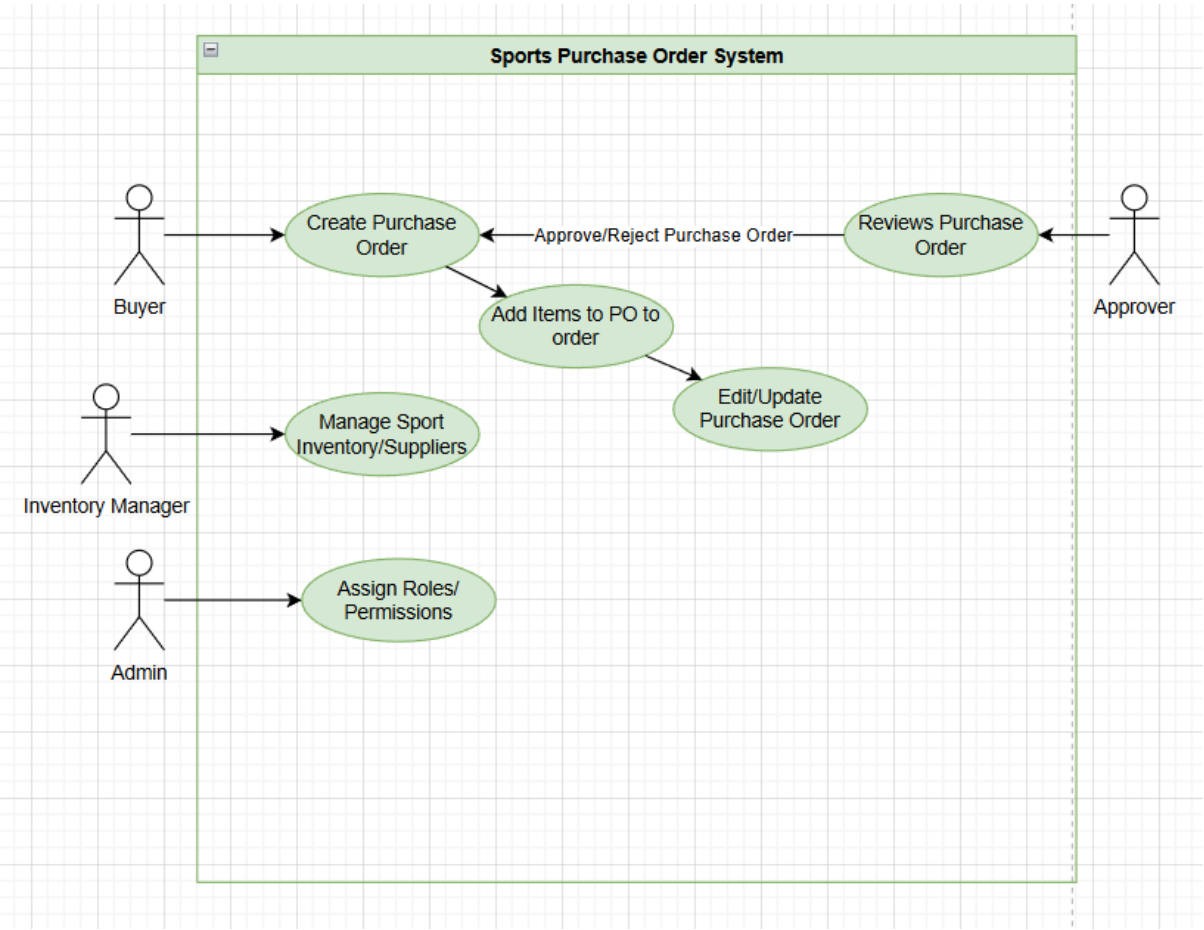
Deliverable 2

Use Case Diagram

Overview: There are 5 roles Buyer, Inventory Manager, Admin and an Approver. Each role has a different function. Below are the functions they server.



1. Buyer creates a purchase order and adds items to the Order
2. Buyer can then edit or update the purchase order after creating the purchase order.
3. Approver can then review all of the purchase order and change the status from Pending, Approved and Rejected.
4. Inventory Manager can monitor the suppliers and the sport products which are being sold.
5. Admin can do all of the above things but more importantly the admin can assign roles and give permissions to people. Admin can also change roles and delete users.
